Known Bugs (i.e. Please send in all corrections and additions to Felix.Gross (at) alumni.ethz.ch!)

Worst Bug: Due to my limited language skills and the databases used a bias towards English and German books is present. There MUST be more books in other languages.

The information about the model usage and the publication years are incomplete

Many books are excluded which explicitly only cover TI machines. Applciations book using TI machine are often included

No software included, bookware is included

Only one ISBN number given (mostly hardcover version)

Indication of page numbers vary according to sources

Usually only the latest edition of a book is listed

No HP Manuals listed

Some bias towards astronomy and navigation

Data on the many Grapevine publications and Ted Kerber's publication is very incomplete

Due to the search strategies there will be some sampling effect in the statistics

Thanks go to:

Richard J. Nelson, Eric Rechlin, Bill Butler, David Hicks, Jeremy Smith
