THE COMPUTERIZED SLIDERULE

**The HP-35 gives you
the power and speed
of a small computer
and it fits in your pocket**

This is the actual size of the HP-35. It weighs only nine ounces and fits comfortably in your pocket.

Provides "stack" of four registers plus one storage memory which can hold intermediate solutions to a problem and bring them back at appropriate time. Allows you to display for review.

Stores a "constant" in memory, and recalls it to display at one touch of a key.

Displays 10 significant digits with the decimal point automatically positioned. Switching between fixed and floating point is automatic. Outside this range, numbers are expressed in scientific notation, with the exponent of 10 shown at extreme right for a total of 200 decades.

Displays pertinent numbers from left to right - while suppressing the usual string of confusing zeros. Negative is displayed by minus sign to left. The light-emitting diode display (shown actual size) is bright red, and easy to read.

Performs protracted and repetitious trigonometric and other intricate functions with a single key stroke. Makes it unnecessary to put in a recurring figure over and over or refer to tables. A series of specific functions or formulas are pre-programmed in the calculator.

THESE HP-35 FEATURES WILL REVOLUTIONIZE YOUR WORKING LIFE

TEST THE HP-35 YOURSELF

Just fill in the order form below (there is a copy for your own records or for your purchasing department) and return it in the reply envelope enclosed.* Within a short time the HP-35 will be in your hands and you can work this remarkable machine yourself - and find out just how valuable it will become to you.

If you are not completely satisfied with the HP-35 you can return it within 10 days and receive a complete refund.

You will find the HP-35 invaluable. It can be used anywhere - when you're travelling, in a hotel room, on the site, in a meeting, at home, at the designers bench, in the laboratory. It allows calculations to be completed at once on the spot - calculations that would otherwise of necessity be deferred. We know you will enjoy working with the HP-35 - it makes life a lot easier.

*If you want to save \$ 20.00, enclose your cheque or money order with the purchase order.

Nov 1972.

CREATORS OF WORKING TOOLS FOR MEN WHO MEASURE, COMPUTE, AND ANALYZE

Hewlett-Packard Company is one of the world's major designers of electronic, medical, analytical, and computing instruments and systems. Founded in 1939, the company has developed thousands of electronic instruments to meet the needs of science, industry, medicine, and education. Currently, a large share of its resources is devoted to the design of computers, computer based systems, and advanced desk top and pocket calculators.

The company is an international organization with some 20,000 employees and products in use in more than 100 countries around the world.
